Ultra Brite & Ultra Slim Edge-Lit LED Light Panel

Ultra-Brite & Ultra Slim Edge-Lit LED Light Panel

Designed to replace inefficient traditional fluorescent lighting fixtures, DVT LED Light Panels are Ultra-Slim, Ultra-Brite, energy efficient, use very low power consumption, have an 8-12 year life cycle with virtually No Maintenance.

DVT LED Light Panels are new and improved, using only patented Cree or SSE Hi-Power LED chips and patented even-lit white acrylic for the highest brightness, reliability and longevity.

When compared to traditional fluorescent tube lighting, DVT LED light panels use up to 80% Less Energy.

DVT LED Edge-Lit Light Panel vs. Traditional Fluorescent Tube Back Lighting
